

# Qualified national experts on Resource Efficient and Cleaner Production (RECP) in Palestine

Since 2015, the United Nations Industrial Development Organization (UNIDO) has, through the EU-funded SwitchMed programme, demonstrated resource-efficient production in Palestine, showcasing its advantages for companies, industries, and society. Through the two successive MED TEST II (2015-2018) and MED TEST III (2019-2023) projects, it has become evident that this approach is relevant for businesses and Palestine's long-term goal of reducing reliance on imported resources and promoting a national green growth pathway. To support this development, UNIDO has developed a qualified pool of RECP service providers for industries in Palestine. This list includes proficient and experienced service providers and industry experts qualified in the TEST methodology and can support your business to become more resource-efficient.

## Service providers qualified within MED TEST III
