 Implementing partners
1.1 Main objective and Methodological Approach

The following roadmap has been designed to provide concrete support and guidance for the implementation of actions to promote the continuity of the SwitchMed Training and Support Programme for Green Entrepreneurs in Jordan and to increase the outreach of its activities and results fostering green entrepreneurship in the country.

The development of this roadmap has been based on previous works consisting of the following elements:

1. A benchmarking study that was developed to enable SwitchMed to place the SwitchMed Programme for Green Entrepreneurs (GE Programme) compared to other programmes supporting entrepreneurs so to be able to make informed decisions around programme design and the delivery mechanisms.

3. A consultation with Jordan’s stakeholders of the entrepreneurship ecosystem conducted in July 2018. 13 keys actors were interviewed among which the SwitchMed Focal Point at the Ministry of Environment, the EU Delegation and public and private business support structures.

1.2 Initial situation

Jordan has a large potential to transition to a green economy due to the high level of political will to support this transition, as evidenced by the Jordan’s Green Growth Plan and its Vision 2025.

Jordan has a relatively strong network of organisations that provide support, mostly technical, to green entrepreneurs and eco-innovative grassroots initiatives. They offer education and training programs, assist in securing workspaces and providing technical services, host communities and events, serve as incubators and organise crowdfunding platforms. These support providers also create informal networking platforms and bring much-needed visibility to the green and social initiatives they serve. It is also important to recognize that the strong political commitment of Jordan for green entrepreneurship creates an enabling environment for these opportunities, and is encouraging supporting organisations to evolve to respond to the unique needs of green and social enterprises.

Most notably, in the areas of resource efficiency, marketing of safer alternatives to hazardous chemicals, and water and energy conservation, there appear to be opportunities for green businesses and grassroots initiatives. However, cross-cutting contextual, legal, financial and technical challenges limit the expansion of these initiatives’ impact.

Principles of sustainable consumption and production have not yet been fully integrated into Jordan’s culture and practices, and the financial support system in place for green entrepreneurs and eco-innovative grassroots initiatives is a relatively weak one. Stakeholders express a need to continue building the skills of green entrepreneurs in the areas of organisation, management, financial planning and fundraising. Other barriers include limited access to skills and knowledge, weak technical support and management competency, difficulty in complying with applicable regulations and policies, the bureaucratic complexity of setting up a company, as well as gender-related challenges for woman entrepreneurs.

To establish high quality support programs and attract external resources to support technically and financially these programs, the business support structure should be more integrated and should embed aggregated impact measurement at sector level.
Green Entrepreneurship Ecosystem Map*—Jordan

*The map structure has been built upon the World Bank report “Igniting Climate Entrepreneurship in Morocco” - World Bank Group, April 2017

3 Vision and Leverage Points

3.1 Vision

The analysis of SwitchMed GE Programme and the key factors driving support for the creation of green and circular businesses led to the development of a theoretical framework that describes the key leverage points determining the effectiveness of the ecosystem supporting the creation of green and circular businesses.

Thus, 4 essential leverage points that condition the existence of an ecosystem favourable to the creation of green and circular enterprises have been identified:

1. Operational (existing entrepreneurship support services)
2. Management (ecosystem of structures supporting entrepreneurship and synergies)
3. Policy instruments (roles of policy makers and public policies)

As a result, the vision for scaling up the program in Jordan has the following objectives: 1) to provide all the services needed to create green and circular businesses; 2) strengthen the capacity of support structures and ensure the synergies and partnerships necessary for the proper functioning of the ecosystem; 3) support public policies supporting the green and circular economy; and 4) to promote a shift in consumer mind-set to increase the demand for green products and services.

The following table shows the actions identified for each level of intervention as well as the institutions to be potentially involved:
### 3 Vision and Leverage Points

<table>
<thead>
<tr>
<th>Level of intervention</th>
<th>ID</th>
<th>Potential Leverage Actions</th>
<th>Institutional support</th>
</tr>
</thead>
<tbody>
<tr>
<td>OPERATION</td>
<td>1</td>
<td>• A public campaign to raise national awareness on green entrepreneurship and its potential. Visibility of the Programme, national awareness campaign</td>
<td>• The national coordinator of the Programme together with the Ministry of Environment can take the lead; the role of the royal family needs to be explored</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>• Reinforce and highlight solutions offered by Green Entrepreneurs by developing impact-oriented storytelling strategies for the sectors</td>
<td>• Switchers Community and existing social economy networks empowered to develop advocacy and communication strategies</td>
</tr>
<tr>
<td></td>
<td>3</td>
<td>• Enhance the demand of green upstream services and product supply at value chain level triggering market opportunities and symbiosis</td>
<td>• Switchers Community supported by specific media outlets (e.g. WAMDA) and impact-oriented agencies (EDAMA, JGBC) to pool communication and awareness-raising efforts</td>
</tr>
<tr>
<td>MANAGEMENT</td>
<td>4</td>
<td>• Establish policy dialogue pathways which can stimulate sector aggregation and recognition of green enterprises</td>
<td>• SwitchMed Policy Roundtables seems to be a good mechanism to engage the actors in the ecosystem</td>
</tr>
<tr>
<td></td>
<td>5</td>
<td>• Establish closer links to the political actors that are ready to deliver additional programme elements and policy pilots</td>
<td>• Ministry of Environment, Jordan Environment Fund, other development programmes (USAID, GIZ, etc.)</td>
</tr>
<tr>
<td></td>
<td>6</td>
<td>• Develop financing instruments targeting green entrepreneurs</td>
<td>• Ministry of Environment, Jordan Environment Fund, other development programmes (USAID, GIZ, etc.) and municipalities can play a role (e.g. Green Amman Project 2020); financial actors</td>
</tr>
<tr>
<td></td>
<td>7</td>
<td>• Policies to support financial situation of green entrepreneurs, e.g. Income tax reduction</td>
<td>• Ministry of Environment, Municipalities</td>
</tr>
<tr>
<td>POLICY</td>
<td>8</td>
<td>• Competitive bidding process for the coordination and partnership is recommended</td>
<td>• Main partner should be a non-profit organisation (e.g. BDC, Ipark, QRCE); guidance on the green business support services provided in Jordan can be provided through this partnership</td>
</tr>
<tr>
<td></td>
<td>9</td>
<td>• Foster integration of services along the ‘entrepreneurial journey’</td>
<td>• SCP/RAC could be the underlying operating system that brings together the different institutions to create an ecosystem-wide collaboration that green entrepreneurs can take advantage of; support from Ministry of Environment, JEF, and other development programmes</td>
</tr>
</tbody>
</table>

4 Roadmap

4.1 Scaling-up Roadmap

The suggested roadmap is the result of an in-depth analysis conducted and validated through 13 interviews with key stakeholders in Jordan. The Roadmap harnesses selected mapped leverage points to envisage change pathways and trigger green entrepreneurship in Jordan.

### Level of the Intervention – Operation

<table>
<thead>
<tr>
<th>Leverage Point</th>
<th>Activity</th>
<th>Time Frame</th>
